ABOUT COMPILE/HER

compileHer (formerly FEMMES) is an organization focused on computer science education for girls.

Projects will include robotics, 3D graphics, music-making software, and much more!

The workshops are open to all girls in grades 6, 7, and 8. No experience is required—our teachers and TAs are well-versed in computer science, and will teach you everything you need to know!

Registration is Open! Register at bit.ly/compileHeratRay2018
